

## Air pressure test manometer with new improved tapered testing needle

The reliable and handy air pressure test manometer from Leister is the perfect solution for testing the integrity of dual track seams. The new and improved tapered testing needle makes it easier to obtain an airtight seal between needle and geomembrane. The new tapered needle is also more stable and resistant to breakage.

- Easy and precise seam testing
- High security due to hand and needle protection
- Practical storage case
- New needle interchangeable with current test needle
